RyniXsoft Data Analysis Internship Week 3 - Process

Date : 19-03-2026

1. Calculations Performed

Total Sales: The SUM function was used to calculate total sales.

Total Profit: The SUM function was used to calculate total profit.

Average Sales: The AVERAGE function was used to find average sales.

Maximum Sales: The MAX function was used to identify highest sale.

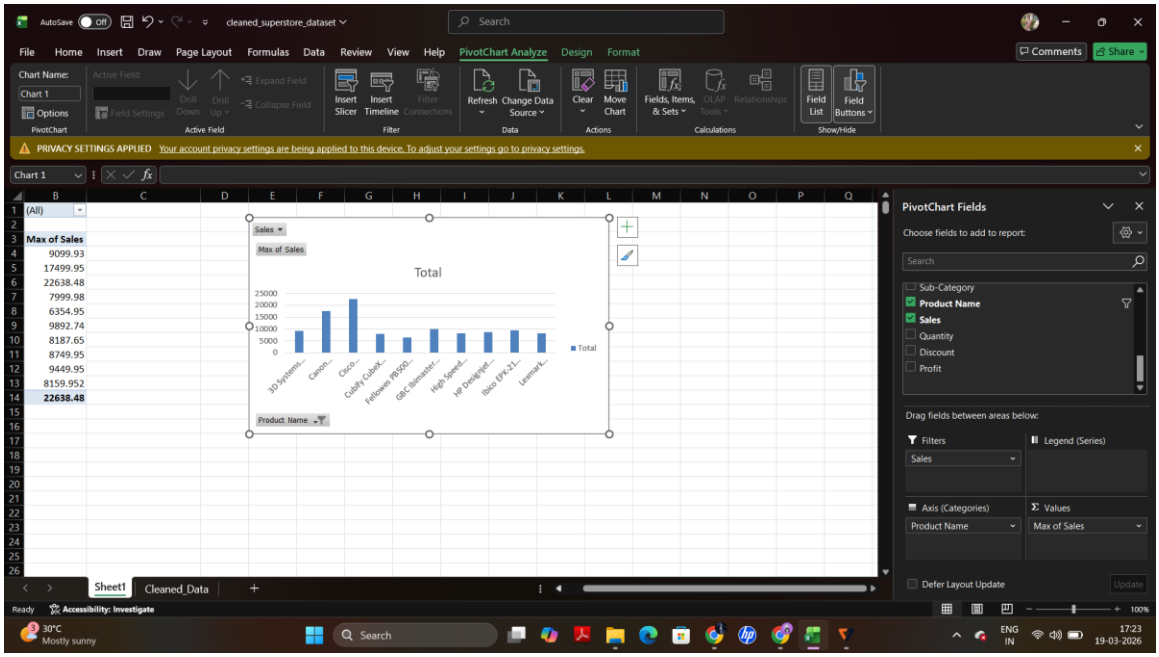
10000								Maximum Sales	22638.48			

2. Pivot Table Analysis

Product vs Sales (Sum): Pivot table using Product Name as rows and Sales as Sum.

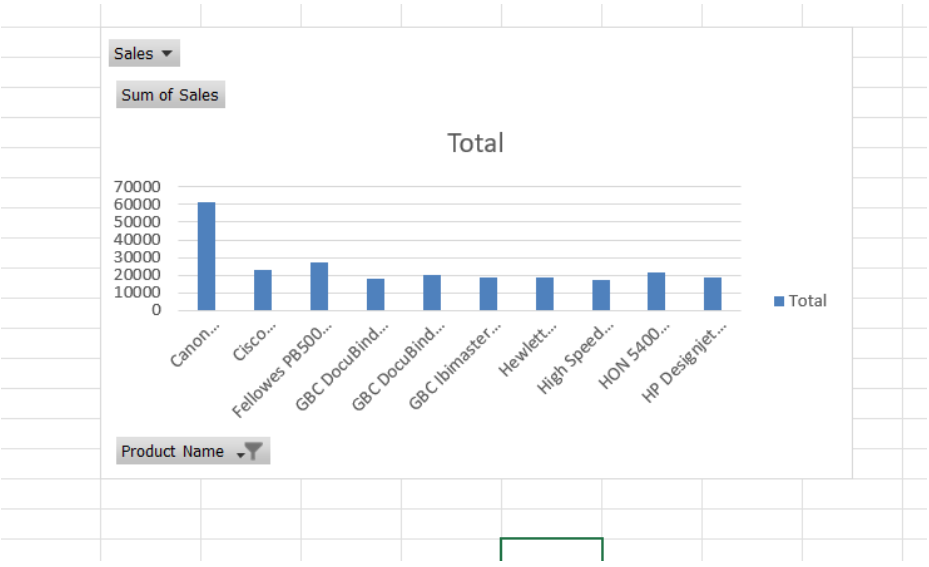
Product vs Sales (Max): Pivot table using Product Name as rows and Sales as Max.



3. Observations

SUM shows overall contribution of products.

MAX shows highest single transaction.



Some products contribute more to total sales.

4. Conclusion

Basic analysis and pivot tables were created successfully for further insights.
